PHARMACOLOGICAL ACTION

Chlortetracycline contained in Biomezin® is a bacteriostatic antibiotic with a wide spectrum of antimicrobial activity, being active against Gram-positive and Gram-negative microorganisms, large viruses and some protozoa. It is well absorbed by the gastro-intestinal tract. Sulfamethazine (sulfadimidine) induces an antimicrobial effect against Gram-positive and Gram-negative microorganisms – hemolytic Streptococci, Staphylococci, Pneumococci as well as an antiprotozoal effect on coccidia. It also exerts antiphlogistic and partially antihistaminic activity.

INDICATIONS

Biomezin® premix is applied for prevention and treatment of Colibacillosis, Edema disease, Bronchopneumonia and Dysentery in pigs.

CONTRAINDICATIONS

Not to be applied in feed containing compounds of calcium and heavy metals.

MODE OF ADMINISTRATION

Biomezin® premix is administered orally, well mixed with the feed. In order to reach uniform homogenization with feed, it is recommended to mix the measured quantity of the preparation (calculated on the basis of the prescribed dose) on stages in the following order: up to 10 kg feed; up to 100 kg feed; and up to 1000 kg feed.

TARGET SPECIES

Pigs.

SIDE EFFECTS
Not established.

WITHDRAWAL PERIOD
For meat: 8 days after the last administration of the product.

STORAGE
Store in the original container, well closed, in dry and well-ventilated facilities protected from direct sunlight.

PACKING
Plastic bottles of 500 g made in polyethylene low density, closed with caps type “cap to cap” made in polyethylene low density equipped with a protective ring. Polyethylene bags of 20 kg placed into paper bags.

WARNING
People handling the product must wear personal protective devices (special clothing, gloves, respirators). During administration of Biomezin® premix avoid contact with eyes and skin because of potential risk of irritation, sensitisation and allergic reactions. Rinse eyes with plenty of water and skin with plenty of soap and water. In cases of overdosage diarrhea may be observed, which passes away after discontinuation of treatment. Keep out of the reach and sight of children.
